Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants representatives argued the definition of "computer system" in claim 1. The Examiner explained first that the Stewart reference recited a "computer system" and second that the crux of the argument was the type of data being collected. Applicants recite data collection and intend the claims to read on an actual computer system and the Stewart reference recites simulated data. The Examiner explained that the issue in question appeared to be the type of data presented to the system and not the system itself. Applicants representatives stated they understood the Examiners position and would provide further amendments to overcome this issue by clarifying the type of data presented to the system..
